

Foodpanda SFTP — Kaise use karein (KPO & Admin)

Yeh simple guide hai un logon ke liye jo roz Foodpanda prices dekhte / update karte hain, aur unke liye jo pehli dafa branch pe SFTP setup karte hain.

Kab use karein: jab aap Foodpanda ko nayi prices / stock CSV bhejna chahte ho — CSV download karke alag se portal pe upload karne ki zaroorat nahi.

Site: <https://szl.aimatic.tech>

Permission: Buying Price Control ya System Manager

1) Pehle yeh 4 baatein yaad rakhain

1. **Har store / Branch ka setup alag hai** — host, port, username, password, time usi Branch form pe likhe jate hain.
2. **Ghuri Town** aur **Misrial** ka **username same** ho sakta hai. Farq aksar **port** mein hota hai.
3. **Port blank** chhorna theek hai → system **22** use karta hai. Kabhi blank save hone ke baad **0** dikhe to tension nahi (matlab 22).
4. Pehli dafa: pehle **manual upload** Success karo, phir auto schedule **Enabled** karo.

2) Administrator — pehli dafa setup (sirf ek dafa per branch)

Aap kahan jaain

1. Desk kholo: <https://szl.aimatic.tech>
2. Search mein **Branch** likho → apni branch kholo
Example: **S1 - Ghouri Town VIP**

Form pe kya bharein (Foodpanda SFTP section)

Field	Aap kya karein
Host	Foodpanda ka SFTP host paste karo
Port	Alag port diya ho to likho; warna khali chhor do
Username	FP_PK_... wala username
Password	Password yahan type / paste karo
Remote Path	Folder diya ho to likho; warna khali
Schedule Time	Rozana auto upload ka time (jaise 06:30:00) — site time
Enabled	Abhi tick mat karo — pehle test upload

Phir

1. **Save** dabao.
2. Neeche **Section 3** wala manual upload ek dafa chalao.

3. Jab **Success** aa jaye, tab **Enabled** tick karke **Save** karo.

Do stores, same username:

Har Branch pe username same rakh sakte ho; **port** us store ka alag set karo (Misrial pe jo port Foodpanda ne diya).

3) KPO / Admin — abhi upload karna ho (manual)

Do tareeqe hain. Jo situation ho, woh choose karo.

Tareeqa A — Poori branch ki list bhejni ho

Kab: saari Foodpanda items update karni hon.

1. Apni **Branch** form kholo.
2. Upar buttons mein **Foodpanda** pe click karo.
3. **Upload Catalog via SFTP** choose karo.
4. Confirm pe **Yes** dabao.
5. Screen pe result aayega:
 - **Success** → file Foodpanda ko mil gayi
 - **Failed** → error padho; **Foodpanda SFTP Upload Log** khol ke detail dekho

Tareeqa B — Sirf kuch items / filters wale rows

Kab: sirf in-stock, ya missing-price fix, ya kuch items change hue hon.

1. Desk pe **Branch Price Sheet** report kholo.
2. Upar **Branch** select karo (sahi store).
3. Filters lagao (jaise In Stock, With Price, item search).
4. Agar price change ki hai:
 - pehle **Foodpanda → Save Foodpanda Prices**
 - phir upload
5. **Foodpanda → Upload Foodpanda CSV via SFTP** dabao.
6. Confirm karo.
7. Sirf jo rows **abhi report mein dikh rahi hain**, wahi jaayengi.

Note: Download Foodpanda CSV alag cheez hai — woh file aapke computer pe save karti hai, Foodpanda ko nahi bhejti.

4) Auto daily upload (schedule)

Kab: roz same time pe automatically bhejni ho.

1. Branch form → **Schedule Time** set karo (example: 06:30:00).
2. Ek dafa **manual upload Success** confirm karo (Section 3).
3. **Foodpanda SFTP Enabled** tick karo → **Save**.

Uske baad system bar-baar check karta hai (lagbhag har 15 minute). Jab aapka time ho chuka ho aur aaj abhi Success na hua ho, tab upload khud chalega.

- Har branch ka time alag ho sakta hai.

- Manual upload schedule se pehle / baad kisi bhi waqt chal sakta hai.

5) Success ya fail — aap kahan dekhein

Branch form pe:

- **Last Foodpanda SFTP Upload** → last successful time
- **Last Foodpanda SFTP Error** → agar fail hua to short error

Poori history ke liye Desk pe **Foodpanda SFTP Upload Log** kholo — status, filename, kitni rows gayi / skip hui.

Common problems (simple)

Aapko kya dikha	Aap kya karein
Missing host / username / password	Branch pe SFTP fields complete karke Save, phir dubara try
Port 0 dikh raha hai	Normal hai agar blank chhora tha — system 22 use karta hai
[Errno 2] /foodpanda-....csv	Remote Path khali rakho (ya sahi folder), dubara upload
No module named 'paramiko'	IT / admin ko bolo — server pe package chahiye

6) Roz ka chhota checklist (KPO)

1. Branch Price Sheet mein prices theek hain?
2. Change kiye hon to **Save Foodpanda Prices**.
3. Abhi bhejni ho to **Upload ... via SFTP**.
4. Roz auto chahiye to admin se **Enabled + Schedule Time** confirm karo.
5. Fail ho to **Upload Log** + Branch pe **Last Error** dekho.
